## Areas of practice

Experienced and self-motivated software developer with 2+ years of expertise in designing, testing, and maintaining innovative solutions. Skilled in React, React-Bootstrap, React-Redux, Redux-Saga, Bit bucket, Bootstrap, GitHub, HTML, JavaScript, JIRA, JSON, Node JS, Express, MongoDB, Tailwind CSS, Typescript.

---

## Professional Experience

### Software Developer | Agrovikas Agritech PVT LTD.

May 2023 – Current

**Skills and Tools:** Node. Js, Express Js, Mongo DB, Typescript, Trello,

- Collaborated with QA engineers for comprehensive bug-free software releases.
- Conducted constructive code reviews to foster collaboration and knowledge sharing.
- Developed scalable web applications using React, HTML, Tailwind CSS, and Typescript.
- Developed responsive web applications using React and Tailwind CSS.
- Designed and developed an CRM platform with dialer.
- Implemented Node. Js and Laravel server APIs for handling large number data.
- Implemented APIs for seamless communication with remote systems.
- Integrated Web socket for Live report of csr (customer service representative) and for calling purpose.
- Interacted with clients, providing tailored customizations to meet specific needs.
- Using troll for daily task management.
- Successfully integrated Trello into daily operations, enhancing task visibility and team collaboration.

### Software Developer | Avanzar solution.

May 2022 – May 2023

**Skills and Tools:** HTML, CSS, JavaScript, React, React-Bootstrap, React-Redux, Redux-Saga, Bit bucket, Jira

- Actively contributed to Agile processes, including daily stand-up meetings and sprint planning.
- Collaborated with QA engineers to conduct comprehensive testing, ensuring bug-free software releases.
- Developed and maintained scalable web applications using React, HTML, CSS, and JavaScript.
- Implemented API bindings for seamless communication between software components and server.
- Participated in root cause analysis and provided effective solutions for complex technical issues.
- Performed requirement gathering, documentation, unit testing, report generation, and project releases.
- Make a high order component and component for reduce repeated code.
- Resolved technical issues through root cause analysis and effective solutions.
- Used Jira for task management and also used bit bucket to manage the source code.

# Project Details

## Project: Dialer with CRM

**Tech Stack:** React JS, Typescript, Node, Express, MongoDB, Tailwind CSS

**Dialer** is maniacally focused on the calling system. In dialer we also be used to broadcast recorded messages through interactive voice message (IVR), push notification and SMS. In that we can save the recording and listen that recording for quality analyst to know customer interest and csr skills to grow the business and also convenient for customer service representative.

- Actively engaged in daily scrum meetings, sprint planning sessions, and progress updates to ensure seamless collaboration within the development team.
- Designed and crafted an intuitive User Interface using React, HTML, Tailwind CSS, and JavaScript.
- Successfully integrated a dynamic menu WordPress.
- Created list modules and given access that modules as per give access to that role.
- Implemented API bindings for seamless communication with the server.
- Proactively identified and resolved software bugs while providing ongoing support to the team.
- Conducted weekly client demonstrations to showcase newly developed features.

## Project: Employee Training Management System (E-TIMS)

**Tech Stack:** React, React-Redux, Redux-Saga, GIT

**Employee training management system (E-TIMS)** is a training management system in that create a sop for new joining employee and after that trainee have to give the mcq test in limited time period if trainee fails more than three time in exam then trainee has taking training under a senior employee.

- Conducted weekly client demonstrations to showcase newly developed features.
- Daily scrum meetings for sprint planning, and progress updates and collaboration.
- Developed a hybrid application using Win JS and Angular for optimal performance.
- Conducted weekly client demos to showcase features, fostering transparency and client satisfaction.
- Embraced a component-driven development approach for enhancing code modularity
- API binding for effective communication with the server, ensuring seamless data exchange.
- Implemented unit test cases, achieving 100% code coverage using Typescript for reliability.
- Utilized Angular CLI for effective development, creating components, services, pipes, & directives.

## Project: karma bees

**Tech Stack:** React Native

It is an online NGO portal where you can post a photographs and videos then you also create a groups or buy the product which appears on the list and then the end-to-end payment process has been done. Whole application istranslated in different languages as well based on the country.

- Engaged in daily scrum meetings and sprint planning for effective project coordination.
- Conducted weekly client demos, showcasing newly developed features to ensure client satisfaction.
- Contributed to the development of a hybrid Win JS and React application, emphasizing reusable components.
- Implemented API binding for seamless server communication.
- Integrated login with google and login with Facebook for customer login.
- Integrated a secure payment gateway, such as PayPal, enabling transactions via Visa & MasterCard.

**Education**

Bachelor of Computer Application, JG College of Computer Application	2022
Higher Secondary (HSC), Seth shri I.N Patel Swaminarayan	2019
Secondary School (SSC), Rachana high school	2017
