SUMMARY

MERN Stack Developer with 3.5+ years of experience building web applications using React, Node.js, Express, and MongoDB. Skilled in creating user-friendly interfaces, writing clean APIs, and improving performance. I enjoy solving problems and delivering quality features that help users.

SKILLS

- **Programming Languages** : JavaScript, Typescript, React Js, Next Js
- **Web Technologies** : HTML/CSS, Tailwind css, JSON, Bootstrap
- **Database Systems** : MongoDB, MySQL
- **Technologies** : React Js, React-Redux, Redux-saga, Redux-toolkit, MultiThreading, REST APIs, Micro services, Design Patterns, Solid Principles, Redis
- **Tools/Methodologies** : GitHub, Gitlab, Trello, Bitbucket, Jira, Postman, Agile Methodology, Scrum
- **AI Tools** : chatGPT, GitHub Copilot, Cursor AI

PROFESSIONAL EXPERIENCE

CMARIX

2024 - Present

Software Developer

- Collaborated in the development of digital workflow automation systems using Node.js, Express.js, and MongoDB, contributing to a 40% increase in system efficiency and enhancing the platform's ability to handle high concurrent user requests.
- Led the development of responsive web applications using React, Redux, and Tailwind CSS, delivering an intuitive UI that resulted in a 20% increase in user engagement and a 40% improvement in overall usability based on user feedback.
- Created and integrated RESTful APIs and third-party APIs, enhancing data exchange efficiency by 50% and streamlining integration processes.
- Implemented React performance optimizations using useMemo, useCallback, and code splitting, resulting in a 60% reduction in component re-renders and significantly improving application load time and responsiveness.
- Actively engaged in daily scrum meetings, sprint planning sessions, and progress updates.

Agrovikas Agritech PVT LTD

2023 - 2024

Software Developer

- Spearheaded the design and implementation of a custom CRM system using React (Typescript) and Node.js (Express), improving client management efficiency and resolving 30+ critical issues, which led to a 20% boost in user satisfaction.
- Implemented robust role-based access control (RBAC) and modular architecture, enabling secure access management and smooth scalability for multiple business functions such as live chat, task tracking, and analytics.
- Integrated real-time communication using Web Sockets for the live chat module, enhancing user engagement and response times within the CRM environment.
- Utilized Git and Trello for version control, enhancing team collaboration and maintaining an organized codebase with 30% fewer merge conflicts.

Avanzar solution

2022 - 2023

Software Developer

- Designed and maintained scalable web applications using React Js,
- Proficient in Agile and waterfall methodologies at all stages of the Software Development Lifecycle (SDLC), participating in Agile Scrum processes to ensure timely delivery of features and enhancements.
- Collaborated with UX/UI designers to create user-friendly interfaces and worked closely with business analysts to gather requirements and translate them into technical terms.
- Conducted unit testing, ensuring 90% code coverage.
- Developed and maintained React based applications, enhancing usability and scalability.

EDUCATION

JG college of Computer Application

May 2022

BCA (Bachelors of Computer Application)
